# LEWIS MOTEN

**Senior Front-End Engineer | React, TypeScript & AI Applications**

Front Royal, VA • (530) 539-4775 • lewismoten@gmail.com
lewismoten.com • github.com/lewismoten • huggingface.co/lewismoten

## PROFILE

Senior engineer who turns complex data and workflows into clear, accessible web applications. Production experience across React/TypeScript, enterprise platforms, health technology, and federal systems; recent independent work spans local AI orchestration, compact model design, and Linux web hosting.

## TECHNICAL STRENGTHS

**Front end:** JavaScript, TypeScript, React, Redux/Redux-Saga, Angular, HTML/CSS, Sass, Canvas, SVG, Highcharts, Recharts, MUI, Vite, Webpack

**Applications:** Node.js, REST APIs, C#/.NET, PHP, Go, SQL Server, PostgreSQL, MariaDB, SQLite, Kafka, Docker, internationalization, Section 508 accessibility

**Quality & operations:** Jest, Jasmine, TestCafe, Ghost Inspector, Jenkins, Git, Forgejo, Linux, WHM/cPanel API, DNS, TLS/SSL, CI/CD

**Applied AI:** Python, PyTorch, Ollama, llama.cpp, OpenClaw, Hermes, local inference, MoE training, quantization, model validation, tool calling

## PROFESSIONAL EXPERIENCE

### Senior Front-End Engineer / Owner | Code Jamboree LLC, Front Royal, VA | 2022-Present

- Build React/Redux and TypeScript interfaces from Figma designs, including localized workflows and interactive charts with Highcharts and Canvas.
- Write unit, integration, and browser tests with Jest, TestCafe, and Ghost Inspector; integrate test and deployment work with Jenkins and Agile/Jira teams.
- Modernized an AngularJS 1.3 application to Angular 16, built cross-browser extensions, and delivered WordPress and small-business web solutions.

### Software Engineer | Decipher Technology Studios, Alexandria, VA | 2019-2022

- Developed React and Redux-Saga interfaces for an enterprise service-mesh platform, supporting data visualization and video/document processing workflows.
- Built Go services for ingestion and resource management, integrating Kafka pipelines, status messages, Docker, and Elasticsearch.

### Senior Software Development Lead | The Goal, Inc. / Deltek Vantagepoint | 2016-2019

- Led front-end work in the transition from Deltek Vision to the browser-based Vantagepoint platform; contributed to single-page architecture, build automation, and cross-team standards.
- Worked across JavaScript, Node.js, Sass, Webpack, C#/.NET, SQL Server, and internationalization.

## PROFESSIONAL EXPERIENCE, CONTINUED

**Senior Web Developer** | **ViiMed, Washington, DC | 2015-2016**

- Built responsive Angular and React applications connecting Bluetooth-enabled medical devices, REST services, and offline synchronization; served as Scrum Master.

**Senior Web Developer / Consultant** | **Analysis Research Planning Corporation | 2011-2015**

- Developed legal and research systems using C#, ASP.NET MVC, Ruby on Rails, SOAP/REST, and SQL; used paired programming, code reviews, and test-driven development.

**Technical Lead / Applications Architect / Software Engineer** | **CSC | 2001-2011**

- Delivered federal and enterprise web, contract, and knowledge systems; modernized ASP/VB6 applications to .NET and SQL Server, supported PKI integrations, and applied Section 508 standards.

## SELECTED INDEPENDENT PROJECTS

**Local Agent Lab | Code and demo**

- Built a React/TypeScript browser workspace for local AI chat, coding, research, and scheduled agents. It supports browser models, Ollama, and API providers while keeping project files and conversations in a local folder or on a removable drive.

**Public-ledger explorer | Source code**

- Built a React/TypeScript, MUI, Recharts, and PHP/MariaDB app for examining public financial data, with 15 multi-value filters, shareable query states, charts, and a virtualized table.

**Zogograph | Public client code**

- Built PHP/SQLite collectors and a JavaScript monitoring dashboard with alerts, AI diagnostic tool calls, and per-investigation cost tracking.

**Tiny Pockets Press | Code and demo**

- Built a modular JavaScript miniature-book editor with layout and imposition logic plus separate interior and cover print/PDF views.

**D64 Storage Lab | Live demo**

- Built a browser-native JavaScript D64 toolkit with reusable disk helpers, sector and read-efficiency visualization, repair diagnostics, deleted-file recovery, and optimize/deoptimize controls.

## EDUCATION

**Associate of Arts, Information Technology** | University of Phoenix, 2008

**Industrial Design Technology coursework** | Art Institute of Pittsburgh
